Immersive experience in Horgen: Schneider Electric and Feller AG open their Innovation Hub

Starting in April 2022, the new Innovation Hub created by Schneider Electric and Feller AG will be providing an in-depth insight into the digital worlds of the future covering all aspects of our lifestyles, homes and work. Visitors can directly learn about forward-looking topics such as intelligent building automation, the connected home and eMobility in a modern, interactive and experience-oriented atmosphere.

Horgen, 4 April 2022 – Beijing, Singapore, Paris, Horgen – from now on, an innovation hub will also be open to customers, partners and interested professional visitors in Switzerland. The hub is well worth visiting for anyone wanting to obtain first-hand information about the future-oriented products and solutions available from technology corporation Schneider Electric and Feller AG. Right in tune with the latest trends, the exhibits and audiovisual media impart everything you need to know about living and working in the modern world. Visitors have the opportunity discover innovations at their own pace and gain inspiration from the pioneering technologies.

One company, two brands: the best of both worlds

The Innovation Hub presents the entire range of products offered by energy and automation specialist Schneider Electric and its subsidiary, Feller AG. On an area of 500 square metres, the innovations and technological developments are presented at all levels, covering every single aspect of the company's portfolio. In addition to intelligent products and solutions for industrial automation, plenty of space is also reserved for the energy networks of the future, building automation and the connected home as a networked, digitalised place to live. The wide range of things to experience is rounded off by topics such as energy efficiency in residential buildings and eMobility.

New momentum for innovation and technology: a place for learning and knowledge transfer

Theoretical knowledge of everything to do with digital technology is only one side of the coin. There is nothing better than actually experiencing the benefits of future living and working environments for yourself under real conditions. "Our new Innovation Hub constitutes a comprehensive, immersive experience. It not only presents networked automation solutions in an appealing setting, but also promotes the networking of knowledge," explains Tanja Vainio, Country President at Schneider Electric Switzerland. The interdisciplinary competence centre also provides the ideal setting for holding training sessions or expert discussion forums in the future.

About Feller

Feller AG is the leading Swiss technology partner for the electrical installation sector. Its pioneering complete solutions for switch design, home automation and networks and for power distribution allow intuitive use of living spaces. In this way, Feller fulfils the growing desire for simplicity, convenience, efficiency and security – at home and at work.

Everyone who lives in Switzerland is familiar with our switches and plug sockets. With their timeless design and excellent quality, they accompany people throughout their entire lives. Around 420 employees are dedicated to ensuring this every single day. We have been developing premium products in Horgen for more than 110 years and are a renowned employer in the Lake Zurich region.

Feller is part of Schneider Electric, one of the world's leading specialists for digital transformation in the energy management and automation fields.
